SLOPSCAPING FOR THE FRUSTRATED GARDENER

Title: Slopscaping for the frustrated gardener

Author: Wilson, Amy

Description: Never heard of slopscaping? Don't be surprised. As far as I know, it doesn't exist outside my yard, or if it does, it's never had a name. But it is a beautiful, people and eco-friendly way to sculpt a garden without breaking your back. It takes the "informal" garden to the next level without requiring an advanced course in horticulture. It's a type of gardening that anyone can do, in any size yard, without an ounce of formal training. I'm living proof.
