Title: Power Generating Windmill, Build Your Own! : A "Do-It-Yourself" Book
Author: Troyer, Henry

Description: The author builds power-generating windmills at his home near Springfield, Missouri. He has had a life-long interest in water, solar and wind energy. Those interests bubbled and brewed quietly beneath the surface of a teaching career in human anatomy until they blossomed fully in the open space of retirement. After borrowing from other people's designs, and modifying them to better suit his purpose, the windmill plan in this book was settled upon. It can be built by anyone with a modicum of ambition and mechanical ability. The satisfaction derived from successfully building a windmill, and harnessing its power, is enormous, and you are invited to share in it.
